Fifth Minute
Project: HomeMaid Development
Date: 22/10/2024
Time: 10:00
Attendees:
Angela Ribeiro
Rita Silva
Hugo Castro
Regina Tavares

Agenda:

1. Task Distribution for Current Sprint
2. Task Breakdown for Better Tracking
3. Homepage Sign-Up Button Placement

---

1. Task Distribution for Current Sprint

Discussion:
The team divided the main outcomes for the sprint across the members to ensure clear accountability and smooth progress. Each member was assigned a specific area of responsibility:

- **Regina:** Responsible for creating the API documentation and the increment report.
- **Hugo:** Tasked with deploying the system increment in containers at the server environment.
- **Angela & Rita:** Assigned to define and implement the REST API endpoints, including CRUD operations.

Conclusion:
All members accepted their respective tasks. The work will be broken down into smaller subtasks to ensure manageability and tracking.

---

2. Task Breakdown for Better Tracking

Discussion:
The team discussed the importance of breaking down larger tasks into smaller, more trackable steps to make it easier for everyone to follow each other's progress. This was particularly relevant for tasks such as API development and container deployment.

Challenges:
Ensuring proper communication and regular updates among the team to track progress effectively. There was concern over potential task overlap.

Conclusion:
The team agreed to use GitHub Projects to assign smaller tasks under each major task, facilitating easier tracking. Regular check-ins will be held to ensure everyone is on track.

---

3. Homepage Sign-Up Button Placement

Discussion:
The placement of the sign-up button on the homepage was debated. Hugo argued that it is common practice to include a visible call-to-action button in prominent places like the homepage itself, in addition to the navigation bar. Rita and Regina found this unnecessary, suggesting that keeping the button only in the navigation bar maintains a cleaner and simpler interface.

Conclusion:
It was decided that the sign-up button will remain only in the navigation bar to maintain simplicity and avoid clutter on the homepage.
